

Wirral End of Life Care Charter

Care, kindness and understanding

LOOKING FOR INFORMATION ON END OF LIFE CARE?

It is now possible to find out what services on Wirral surrounding end of life care are available from a single source: www.endoflifecarewirral.org,

As people reach this difficult stage of their life they can be baffled by how to access the information they need. This new website launched 11th May 2016 is specifically designed to help them identify the services which could be useful to them, their families, friends and carers. It can be used by anyone, including professionals who are seeking guidance.

The Resource is the second phase in the Wirral End of Life Care Charter, which was launched just a year ago. The Charter embodies 12 expectations for high quality end of life care, and seeks to reassure everyone with its watchwords of 'Care, Kindness and Understanding'.

"We want everyone to know that, here on Wirral, our healthcare and social professionals are constantly striving to give the best possible end of life care," said Julie Gorry, chief executive of Wirral Hospice, and representative of Wirral Palliative and End of Life Care Partnership Group. "It can make such a difference to the person themselves, but also to their families and carers, who also need support at this difficult time."
